MATERNAL LOVE.

The strength of maternal love received a beautiful illustration in the wife of a canal-boat captain yesterday morning, She swoke to find that a lamp had exploded in the cabin, which was wrapped in flames. She gathered the children together and guided them out, their clothes and hair on fire.

Then it was discovered that the threeyear-old boy, DENNIS, was still in the blazing cabin. The mother crawled in through the window, rescued the boy and was taken out almost unconscious. It is sad to have to record the death of the little boy who had roused his mother to heroism.

PLAUSIBLE ADVENTUREES.

Despite the publicity given to the cases of deception in which some rogue has passed bimself off as a gentleman and plundered good-natured citizens, the same old trick is played again and again on the good-natured citizens. Nearly always the rascal passes himself off as a obleman, and here is betrayed the weakness of so many Americans for anything like a title.

Very little sympathy can be feit for the silly people who are imposed upon by such oily rascals. But human nature is confiding and it takes it a long time to learn a simple lesson. Beware of the titled foreigner!

It would appear that the difficulties and pains of the miners' life do not deaden him to the enjoyment of something entertalning. At Wilkesburre a lively priza-dight took place early Sunday morning.

Only the female insane are treated on Blackwel.'s Island. The male indigent who goes crazy is sent to Ward's Island. The asylums on these islands are supported by the city, and any one unable to afford a paid retreat is sent to them. A certificate signed by two physicians is all that is necessary to proclaim a rerson inside and cause him or her to be im-mured in one of these asylums. The physicians are all men of experi-ence and specialists in brain diseases.

Accepting Dr. Tyler's invitation, the reporter went into one of the "melancholia" wards. It was charming. Near the door were arranged a lot of flowers and greens, and several canary birds sang in cages swung among some paim trees. The floor of the corridor was clean enough to eat from and smooth enough to skate on. The first room off the corndor is used as a parior by the immates of that ward, and here about thirty of them were assem-bied. Some were sewing, others were reading and a few were playing checkers. San-ness was stamped on each face. Most of

ness was stamped on each face. Most of the women in this ward were young and not a few surpassingly attractive. Those of them who were conversing talked in low, constrained voices, as if featral of being overheard. They seemed to be a lot of people unjustly condemned to some fearful penalty and suffering their pun-ishment without complaint.

As the physician and the reporter walked in among them all conversation ceased, and the poor lunatics raised their heads
